### Exports to Middle East jump 29pc in July-November

Exports to the Middle East bounced back with a growth of 28.98 per cent to \$1.257 billion in the first five months of the current fiscal year against \$974.50m from a year ago. A surge in demand for Pakistani products was observed from countries like the United Arab Emirates, Saudi Arabia and Kuwait, according to data compiled by the State Bank of Pakistan. However, the exports to Qatar decreased during the period under review. The government has recently signed a free trade agreement with the Gulf Cooperation Council (GCC) countries which will further facilitate Pakistan's exports to the region. <u>Click to see more</u>

# Consumers get no relief despite strong rupee, low costs

Falling world commodity prices, low transportation costs and stability in the exchange rate have failed to bring any respite for the consumers in the last five months as retail prices either crawled up or held unchanged due to an ineffective price checking mechanism. A drop of over 16 per cent in food imports during 5MFY24 to \$3.35 billion from \$4bn in the same period last year might have helped in curtailing the current account deficit (CAD). However, wheat, palm oil and pulses continued to hold a bulk share in the overall food imports. Besides paying high prices for edible items, the extra burden of high utility bills has made the lives of many low- and middle-income families more miserable, causing them either to adjust the usage of electrical appliances or to curtail food purchases. <u>Click to see more</u>

### UNDP sees debt management bigger challenge for new govt

The new government in Pakistan must have a plan to tackle the debt challenge, with a reform agenda enhancing financial management, increasing revenue, enforcing fiscal discipline, diversifying funding sources and effectively managing debt, suggests the United Nations Development Programme (UNDP). The UN agency's latest publication — Development Advocate Pakistan — further suggests that parliament should provide regular oversight of treasury operations, and by putting these measures into action. <u>Click to see more</u>

### Rupee to range between 297 and 321 per dollar by June-end

Pakistani currency is projected to depreciate 5-12% over the next six months to somewhere between Rs297 and Rs321 to a dollar in the inter-bank market by the end of current fiscal year on June 30, 2024. The forecast comes on the back of a potential uptick in demand for the greenback to pay for imports and repay the maturing debt, according to reports of research houses. Currency dealers anticipated that the rupee would close at slightly above Rs280/\$ by the end of December 2023. It ended at Rs282.73/\$ on Tuesday (December 26), with a loss of 20.5%, or almost Rs58, in the past one year. <u>Click to see more</u>
